Trump's true legacy: Driving scientific brilliance out of America

Donald Trump's presidency wasn't just a chaotic political sideshow—it was a slow-moving catastrophe for American science. While his antics entertained cable news viewers and outraged social media, a quieter tragedy was unfolding: the systematic alienation of the global scientific community.

Trump is, perhaps, a unique specimen in presidential history. Rarely has a U.S. president so blatantly blended politics with personal profit. From foreign dignitaries booking rooms at his hotels to his relentless promotion of Trump-branded businesses while in office, his time in the White House blurred the lines between public service and private gain.

But beyond the scandals and sound bites lies a less flashy, far more devastating story: Trump's war on science.

While past administrations—Democratic and Republican alike—invested in research and innovation to keep America globally competitive, Trump did the opposite. He decimated science budgets, undermined federal research institutions, and gutted programs that had long been the backbone of U.S. technological leadership.

In a display of self-sabotage that would make any autocrat proud, the Trump administration slashed funding for the National Institutes of Health (NIH) and the National Science Foundation (NSF). His proposed 2021 budget recommended a 40% cut to the NIH and a jaw-dropping 55% cut to the NSF. NASA, the Environmental Protection Agency (EPA), and the National Oceanic and Atmospheric Administration (NOAA) weren't spared either.

These cuts had real consequences. Thousands of scientists lost jobs or saw their research dry up overnight. Universities froze hiring, halted grants, and in some cases, shut down entire research programs. Even international collaboration suffered as Trump's draconian visa restrictions and xenophobic immigration policies discouraged foreign scientists from coming—or staying—in the United States.

In a particularly chilling move, the Trump administration even revoked Harvard University's ability to admit international students—a policy so controversial that it was swiftly challenged in court.

But as America fumbled, the rest of the world seized the opportunity.

Canada launched its Canada Leads initiative to recruit displaced U.S. biomedical researchers. France's Safe Place for Science program rolled out in Aix-en-Provence, offering refuge to scientists who felt threatened under Trump's anti-science regime. Australia introduced the Global Talent Attraction Program, dangling competitive salaries and relocation packages to lure away American minds.

This is no small matter. After World War II, the U.S. invested heavily in science and became the birthplace of the internet, life-saving vaccines, treatments for cancer and cardiovascular disease, and even the smartphone. Now, that entire system teeters on the edge of collapse—not from natural decay, but from deliberate sabotage.

Let's not pretend this was about fiscal responsibility. Trump's bloated military spending and lavish tax cuts for billionaires reveal where his priorities truly lay. The dismantling of federal science was ideological, not economic. He waged war on climate scientists, mocked epidemiologists during a global pandemic, and replaced data-driven policymaking with conspiracy theories and gut feelings.

Recruiters and research institutions abroad are now watching with interest—and opportunism. They know what the Trump administration refused to acknowledge: scientific talent is mobile. And when driven away, it rarely returns.

To be fair, it's too early to predict a full-blown brain drain. Relocation takes time, and practical barriers such as language, family needs, and pension systems remain. But make no mistake—the damage is done. Scientists may stay, but they are shaken. Young researchers may think twice before staking their careers in a country that treats expertise with contempt.

Trump may have failed to build his infamous wall, but in the world of science, he successfully constructed a blockade—one that pushed away the very minds who once made America the global epicenter of innovation.

The question now is whether the nation can undo damage or whether it will continue hemorrhaging talent to countries that still value facts over slogans and truth over tweets.

Music and trailer launch of 'Mrs & Mr' held in Chennai

The music and trailer launch event of 'Mrs & Mr', a film written, directed, and starring actress Vanitha Vijayakumar in the lead role, was grandly held in Chennai.

Produced by Vanitha Film Productions, Mrs & Mr stars Robert, Vanitha Vijayakumar, Sriman, Shakeela, Ganesh, Aarthi Ganesh, Power Star Srinivasan, Chef Thamu, Kumtaji, and several others.

The cinematography

for this film was jointly handled by T. Rajapandi, Vishnu Ramakrishnan, and T.G. Kapil. Music is composed by Srikanth Deva. The editing work was done by Balaguru.

This family entertainer has been produced by Jovika Vijayakumar on behalf of Vanitha Film Productions.

The music and trailer launch of this film, which is set to release in June, was attended by actor

Anbu Mayilsamy, actress Fathima Babu, Ganesh, Power Star Srinivasan, Ambika, Praveen Lal Vani, Shakeela, Dhannanjayan, Vasanthabalan, Srikanth Deva, Vanitha Vijayakumar, Jovika Vijayakumar, producer Madhialagan, Kiran, and Sharmila.

Vanitha Vijayakumar, daughter of actor Vijayakumar, made her debut in the film industry with the 1995 film Chandralekha.

Following that, she acted in several films such as Devi, Naan Rajavanga Pogiren, and Aneethi. She also completed acting in the film Pick Up Drop alongside Power Star, which is yet to be released.

During the event, the film's trailer was released by the movie team. The team announced that the film is scheduled for a June release.

'Vembu': Poignant social drama

Director: V Justin Prabbu

Cast: Harikrishnan, Sheela Rajkumar

Vembu is a poignant social drama that sheds light on women's empowerment through the evocative lens of Silambam, the ancient Tamil martial art. At its heart lies the compelling story of Vembu, a spirited young woman raised by her forward-thinking father to embody courage, independence, and resilience. When confronted with an arranged marriage to Sakthivel, her convictions are put to the test, setting the stage for a narrative rich in emotion and cultural texture.

Sheela Rajkumar delivers a standout performance as Vembu, capturing both the quiet strength and emotional vulnerability of her character with authenticity. Her portrayal is grounded and affecting, drawing the audience into Vembu's inner world. Opposite her, Hari brings warmth and subtlety to the role of Sakthivel, particularly in the emotionally resonant latter half of the film. The understated chemistry between the leads lends the story a quiet but persuasive depth.

Visually, the film is striking. The cinematog-

raphy captures the rustic beauty of rural Tamil Nadu with elegance, grounding the film in a strong sense of place. The music and songs, though serviceable, don't leave a lasting impression, and the editing occasionally falters with abrupt transitions and pacing issues that disrupt the emotional flow.

Vembu is an emotionally resonant and socially relevant film. It stands out for its sincerity of

purpose and the depth of its storytelling. With compelling performances and a thoughtful message, it leaves the audience with both hope and introspection. Vembu is a com-

mendable effort—a film that speaks with heart, and one that deserves to be seen and appreciated for its bold message and honest delivery.

Chennai Cruise terminal set for major upgrade

Chennai, May 27: The Chennai Port has initiated a significant expansion and modernization of its cruise terminal, aiming to enhance passenger experience and accommodate the growing demand for cruise tourism. The upgraded facility is expected to be operational by September 2025.

Increased Capacity: The terminal's capacity will rise from 1,000 to 1,800

passengers, facilitating smoother boarding and disembarkation processes.

Infrastructure Enhancements: Upgrades include the installation of new elevators on both eastern and western sides, escalators, and an improved baggage handling system. Separate screening and frisking zones for international arrivals are also being introduced.

Facility Renovations:

Renovations are underway for washrooms, the mezzanine level, and both northern and southern sections of the terminal to improve overall passenger comfort.

Initially, only the northern side of the terminal was operational, leading to congestion. The current expansion addresses this issue by enhancing space and facilities.

Authorities anticipate

that these upgrades will reduce passenger waiting times, improve comfort, and attract more cruise ships to Chennai. The immigration department is also enhancing facilities to ensure seamless passenger clearance.

Industry experts suggest that Chennai's strategic location positions it as a potential hub for cruise travel to destinations like Puducherry, Sri Lanka, the Maldives, Lakshadweep, and Port Blair. Modernizing the terminal to international standards is expected to attract better opportunities and boost the region's cruise tourism sector.
